Innovate Awarding

When you work with Innovate Awarding, you're working with an awarding organisation that sets itself apart – a dynamic company with a collaborative approach to doing business. We're consultative and innovative...everything that our customers say they want an awarding organisation to be.

We're easy to work with, committed and passionate about exceeding our customers' expectations. We're not tied down by bureaucracy and red tape and can think outside the box and respond quickly to our customers' needs.

We have a Performance Pledge that details guaranteed response times. Copies of these can be found on our website www.innovateawarding.org.

Feedback

Your feedback is very important to us. We're always open to suggestions when it comes to enhancing and improving our services, products and systems. Email us at contactus@innovateawarding.org or call us on 0117 314 2800.

Complaints

If we do get things wrong, we'll make every effort to resolve your issues quickly and efficiently. If you'd like to raise a formal complaint then we recommend you read our Complaints Procedure which can be found on our website.

Fees

Our fees structure is transparent and straightforward. Our fees are published on our website in a clear format with no hidden charges. Unlike other awarding organisations, we do not charge an annual centre fee. Visit our website to compare our fees.

Enquiries and appeals

We recognise that sometimes decisions are made that a centre (or learner) may wish to appeal. We have an Enquiries and Appeals Policy and Process on our website that sets out guidelines on grounds for appeal and the process.

Data Protection

Innovate Awarding takes the protection of data seriously; we have a data protection statement outlining how we and our centres, comply with the current legislation on data protection. This statement can be found on our website.

Equality and Diversity

Innovate Awarding is committed to giving everyone who wants to gain one of our qualifications an equal opportunity of achieving it in line with current UK legislation (Equality Act 2010) and EU directives.

Centres are required, as conditions of approval, to use an equality and diversity policy that works together with ours and that they maintain an effective complaint and appeals process. We expect centres to tell learners how to find and use their own equality and diversity and appeals processes. For information, please visit our website.

Reasonable Adjustment and Special Consideration

All learners must be treated fairly and equally and be given every opportunity to achieve our/the qualifications. A copy of our policy on Reasonable Adjustments and Special Considerations, and application form, can be found on our website.

Malpractice and Maladministration

Innovate Awarding has a responsibility to do everything it can to prevent any malpractice or maladministration from occurring, and where it has already occurred, ensuring action is taken proportionate to the gravity and scope of the occurrence.

A copy of our policy and procedure on Malpractice and Maladministration is available on our website.

Recognition of Prior Learning (RPL)

RPL recognises how the contribution of a learner's previous experience could contribute to a qualification or unit. Innovate Awarding have produced guidance on RPL and this can be found within our Information and Guidance for Centres on our website.

Please note the above is not a comprehensive guide to running qualifications. Once approved centres must adhere to the Centre Agreement and Information and Guidance for Centres.

The Regulated Qualifications Framework (RQF)

What is the RQF?

The Regulated Qualifications Framework (RQF) is an Ofqual regulated system of cataloguing qualifications. Qualifications on the RQF can be found by their size or level. Qualifications at a given level can differ depending on their content and purpose.

All of Innovate Awarding's qualifications are on the RQF.

Qualification Level

The level reflects the challenge or difficulty of the qualification. There are eight levels of qualification from 1 to 8, supported by three "Entry" levels.

Qualification Size

The size of a qualification reflects the estimated total amount of time it would take the average learner to study and be assessed. The size of a qualification is expressed in terms of Total Qualification Time (TQT). The time spent being taught or supervised, rather than studying alone, is the Guided Learning Hours (GLH).

Qualifications can sit at different levels, but require similar amounts of study and assessment. Similarly, qualifications at the same level can take different amounts of time to complete.

Skills for Care and Development Assessment Principles

1. Introduction

- 1.1 Skills for Care and Development (SfC&D) is the UK sector skills council (SSC) for social care, children, early years and young people. Its structure for realising the SSC remit is via a partnership of four organisations: Care Council for Wales, Northern Ireland Social Care Council, Scottish Social Services Council and Skills for Care (adult social care only).
- 1.2 This document sets out the minimum expected principles and approaches to assessment, and should be read alongside qualification regulatory arrangements and any specific requirements set out for particular qualifications. Additional information and guidance regarding assessment can be obtained from Awarding Organisations and from SfC&D partner organisations
- 1.3 The information is intended to support the quality assurance processes of Awarding Organisations that offer qualifications in the Sector.
- 1.4 Where Skills for Care and Development qualifications are jointly supported with Skills for Health, Skill for Health assessment principles should also be considered:
<http://www.skillsforhealth.org.uk/images/standards/qcf/Assessment%20of%20Competence%20-%20Skills%20for%20Health%20Assessment%20Principles.pdf>
- 1.5 Throughout this document the term unit is used for simplicity, but this can mean module or any other similar term.
- 1.6 In all work we would expect assessors to observe and review learners practising core values and attitudes required for quality practice. These include embracing dignity and respect, rights, choice, equality, diversity, inclusion, individuality and confidentiality. All learners should follow the appropriate standards for conduct and all those involved in any form of assessment must know and embrace the values and standards of practice set out in these documents.
- 1.7 Assessors should ensure that the voices and choices of people who use services drive their practice and that of their learner. This will be apparent throughout the evidence provided for a learner's practice'

2. Assessment Principles

Good practice dictates the following:

- 2.1 Learners must be registered with the Awarding Organisation before formal assessment commences.
- 2.2 Assessors must be able to evidence and justify the assessment decisions that they have made.

- 2.3 Assessment decisions for skills based learning outcomes must be made during the learner's normal work activity by an occupationally qualified³, competent and knowledgeable assessor.
- 2.4 Skills based assessment must include direct observation as the main source of evidence, and must be carried out over an appropriate period of time. Evidence should be naturally occurring and so minimise the impact on individuals who use care and support, their families and carers.
- 2.5 Any knowledge evidence integral to skills based learning outcomes may be generated outside of the work environment, but the final assessment decision must show application of knowledge within the real work environment.
- 2.6 Assessment decisions for skills based learning outcomes must be made by an assessor qualified to make assessment decisions. It is the responsibility of the Awarding Organisation to confirm that their assessors are suitably qualified to make assessment decisions.
- 2.7 Simulation may not be used as an assessment method for skills based learning outcomes except where this is specified in the assessment requirements. In these cases, the use of simulation should be restricted to obtaining evidence where the evidence cannot be generated through normal work activity. Video or audio recording should not be used where this compromises the privacy, dignity or confidentiality of any individual or family using services.
- 2.8 Where the assessor is not occupationally competent in a specialist area, expert witnesses can be used for direct observation where they have occupational expertise in the specialist area. The use of expert witnesses should be determined and agreed by the assessor, in line with internal quality assurance arrangements and Awarding Organisation requirements for assessment of units within the qualification and the sector. The assessor remains responsible for the final assessment decision.
- 2.9 Where an assessor is occupationally competent but not yet qualified as an assessor, assessment decisions must rest with a qualified assessor. This may be expressed through a robust countersigning strategy that supports and validates assessment decisions made by as yet unqualified assessors, until the point where they meet the requirements for qualification.
- 2.10 Witness testimony from others, including those who use services and their families, can enrich assessment and make an important contribution to the evidence used in assessment decisions.
- 2.11 Assessment of knowledge based learning outcomes
 - may take place in or outside of a real work environment

- must be made by an occupationally qualified and knowledgeable assessor, qualified to make assessment decisions
 - must be robust, reliable, valid and current; any assessment evidence using pre-set automated tests, including e-assessment portfolios, must meet these requirements and can only contribute to overall decisions made by the assessor
- 2.12 It is the responsibility of the Awarding Organisation to ensure that those involved in assessment can demonstrate their continuing professional development, up to date skills, knowledge and understanding of practice at or above the level of the unit.
- 2.13 Regardless of the form of recording used for assessment evidence, the guiding principle must be that evidence gathered for assessment must comply with policy and legal requirements in relation to confidentiality and data protection. Information collected must be traceable for internal and external verification purposes. Additionally, assessors must ensure they are satisfied the evidence presented is traceable, auditable and authenticated and meets assessment principles.

3 Quality Assurance

- 3.1 Internal quality assurance is key to ensuring that the assessment of evidence is of a consistent and appropriate quality. Those carrying out internal quality assurance must be occupationally knowledgeable in the unit they are assuring and be qualified to make quality assurance decisions. It is the responsibility of the Awarding Organisation to confirm that those involved in internal quality assurance are suitably qualified for this role.
- 3.2 Those involved in internal quality assurance must have the authority and the resources to monitor the work of assessors. They have a responsibility to highlight and propose ways to address any challenges in the assessment process (eg. to ensure suitable assessors are assigned to reflect the strengths and needs of particular learners)
- 3.3 Those carrying out external quality assurance must be occupationally knowledgeable and understand the policy and practice context of the qualifications in which they are involved. It is the responsibility of the Awarding Organisation to confirm that those involved in external quality assurance are suitably qualified for this role.
- 3.4 Those involved in external quality assurance have a responsibility to promote continuous improvement in the quality of assessment processes.

4 Definitions

- 4.1 **Occupationally competent:** This means that each assessor must be capable of carrying out the full requirements of the area they are assessing Occupational competence may be at unit level for specialist areas: this could mean that different assessors may be needed across a whole qualification while the final assessment

decision for a qualification remains with the lead assessor. Being occupationally competent means also being occupationally knowledgeable. This occupational competence should be maintained annually through clearly demonstrable continuing learning and professional development.

- 4.2 **Occupationally knowledgeable:** This means that each assessor should possess, knowledge and understanding relevant to the qualifications and / or units they are assessing. Occupationally knowledgeable assessors may assess at unit level for specialist areas within a qualification, while the final assessment decision for a qualification remains with the lead assessor. This occupational knowledge should be maintained annually through clearly demonstrable continuing learning and professional development.
- 4.3 **Qualified to make assessment decisions:** This means that each assessor must hold a qualification suitable to support the making of appropriate and consistent assessment decisions. Awarding Organisations will determine what will qualify those making assessment decisions according to the unit of skills under assessment. The Joint Awarding Body Quality Group maintains a list of assessor qualifications, see Appendix C.
- 4.4 **Qualified to make quality assurance decisions:** Awarding Organisations will determine what will qualify those undertaking internal and external quality assurances to make decisions about that quality assurance.
- 4.5 Expert witness: An expert witness must:
- have a working knowledge of the units for which they are providing expert testimony
 - be occupationally competent in the area for which they are providing expert testimony
 - have EITHER any qualification in assessment of workplace performance OR a work role which involves evaluating the everyday practice of staff within their area of expertise.
- 4.6 **Witness testimony:** Witness testimony is an account of practice that has been witnessed or experienced by someone other than the assessor and the learner. Witness testimony has particular value in confirming reliability and authenticity, particularly in the assessment of practice in sensitive situations. Witness testimony provides supporting information for assessment decisions and should not be used as the only evidence of skills.

Additional information about this unit

Policies and agreed ways of working – this will include organisational and national policies. These may be attached to standards or frameworks

Others will include those staff for whom you have responsibility

Purpose of appraisals to include:

- mutual responsibilities
- the achievement of objectives
- reflection on overall performance
- professional development
- how outcomes of the appraisal will be used
- future objectives

Mutual responsibilities – The underpinning principle of appraisal is that both parties engage in a conversation rather than it being a “top-down” process. Therefore, there is an element of joint responsibility and both parties should familiarise themselves of the competences against which the appraisal is measuring performance and identify evidence of compliance or non-compliance. There should be no surprises in the appraisal as non-compliance issues should already have been raised and discussed

Range of sources may include:

<ul style="list-style-type: none"> • Feedback from individuals, carers and families • Feedback from other colleagues, other professionals • Own observations • Work products
